CONFORMANCE CERTIFICATE 94/9/ EG (ATEX)

We hereby certify that all ENIDINE standard shock absorbers are in accordance with EC specifications 94/09/EG Part 1, ATEX, if applied as per catalogue instructions.

Definition:

94/09/EG Part 1 includes:

Principles and requirements according German version EN 13463-1:2001 non-electrical equipment intended for use in potentially explosive atmospheres, as well as EN 13463-5 Paragraph 4.1 assessment of suitability and judgement of potentially inflammable goods according prEN 13463-1:200 (D).

Catalogue specifications:

All details, technical data and specifications of the product used in standard and special applications are related to a temperature limit of 80° C (max).

All kinds of applications in a higher temperature range are subject to special examination of the contract and require the use of special dampers.
